

Job Title: Project Manager - SAP SCM Upgrade and Linux Migration

Location: San Diego, CA

Duration: 6 Months

We are looking for a Project Manager with Linux Migration + SCM Upgrade project. This project will move LiveCache and the remaining SAP app servers to Linux (from AIX). We will also be upgrading to SCM 7.

Required Skills:

- Project manager with SAP upgrade/delivery experience
- R/3 (SD/MM), APO (GATP)
- EWM a plus
- Experience leading a project team of ~10 people
- Coordination of on and offshore resources
- OS migration experience a big plus
- Data center migration experience a plus
- PMP or other certifications a plus
- Experience with testing automation with QTP a plus
- We are looking for someone who can take this from the beginning, build out the project plan, socialize it and get buy in, build the project team, and begin execution
- This project will have to be coordinated with data center move and so some resources and timelines will overlap
- There will be coordination with Basis team and this person will have to manage them to the project schedule, though they are not directly under the project manager
- This person will need to be able to get their hands dirty enough to understand the quality of the testing being performed
- This means that they need to know enough about SAP to ask the right questions and dig in to details
